

Even More Monkey Island Design Scribbles.

I am not going to throw these out! That was a joke! Several years ago they got water damaged, so now they are sealed in water proof wrapping and kept safe and insured for \$1,000,000.

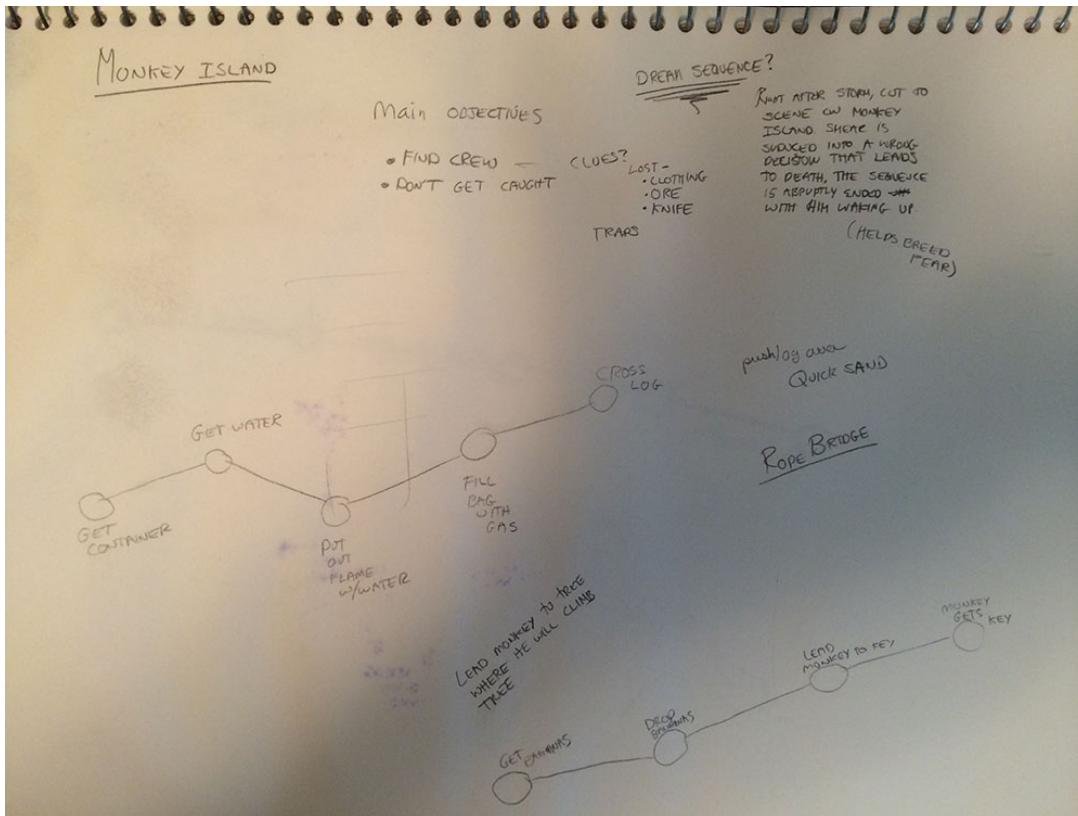

Also, this is not the "design document", they are just notes and ideas I'd jotted down. There wasn't a formal design document for the game, just the large complete puzzle dependency chart I keep on my wall. I have no idea where that went to.

Many more to come. Posting these is easier than writing actual blog entries. I'm lazy.

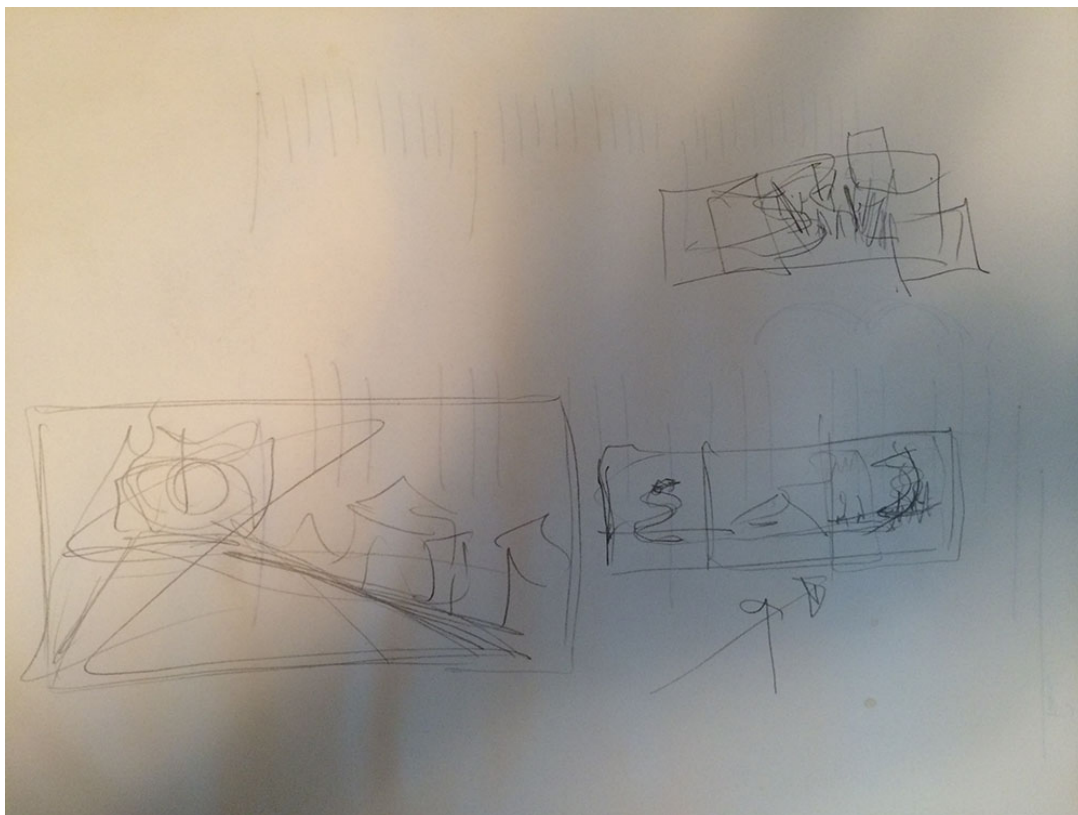

Notes and ideas for Ghost ship and on Monkey Island.

The dream sequence had to wait until Monkey Island 2.

Room layout sketches.
