

ALPHA
POLARIS

mergegames

Welcome to "Alpha Polaris" Rune Knudsen! Here in peaceful Greenland you will be able to follow your studies of the behaviour of ice bears. Furthermore there are some spectacles awaiting you: within the next few days there will be fascinating auroras! Enjoy you time in this peaceful place!

CONTROLS:

Mouse-navigation and interaction

The cursor will turn bright green when it is over a hotspot and an action symbol will appear under the cursor. These actions can be executed by clicking the mouse.

Right Click Left Click

Standard cursor: Left click to move

Marked cursor

Investigate

Object

Speak

Continue Dialogue

Leave the scene: Double click to leave the scene immediately

Close up view

Hotspot

ESC: open game menu

F1: this screen

ENTER: continue discussion

LEERTASTE: Hotspot-Help (shows all interesting spots in the scene)

I: Runes bag (open/close inventory)

explanationofthegameoptions

automatically closed bag: Rune closes his bag (inventory) automatically

Hint system: One left-click on Rune provides you with hints about what to do next

Inventory

Rune's bag can be opened or closed by left-clicking or by pressing "1" on your keyboard

Note: watch the symbols below the cursor. In many cases you are able to left- and right-click on an item for interaction. A right-click will provide a closer look on the item and a left-click leads to an action.
