

WELCOME TO THE FUTURE

# WELCOME TO THE FUTURE

There was a man  
before the fire  
who crawled only on earth  
who prayed for heat

There was a man  
before the chip  
who flew in the skies  
who prayed for a smaller world

There was a man  
before electricity  
who traveled by foot  
who prayed for power

There was a man  
who flew through space + time  
only in his mind  
until he crossed that line

There was a man  
before the plane  
who moved through the streets  
who dreamed to fly

The line has been crossed  
Theres no turning back  
Welcome to the Future

The line has been crossed  
Theres no turning back  
Welcome to the Future

Look, as far as you can  
Out, late at night  
make your world expand

## The Pulse

Come sun, come rain, these fields are sown  
Blood runs, through veins, this one has flown

Hear the wind whisper  
Changes on the breeze

These days, fruit waves, oceans of green

It comes in the spring this torturous thing  
that I'm feeling

It flows from the rain on my permanent wings  
and I'm free yeah

Prepare yourself, the record soon will show

Aware yourself, prepare yourself to grow

When it seems that the sum of things

Is No

Remember this dream

It comes from the spring

## Coming Soon

Think about the ancient ways  
Seems they had a lot to say  
No one knows how to read the signs  
Secrets lost to the sands of time

Forget the why  
Forget the when  
Shadows in the corners of the minds of men  
When you realize  
Look up to the skies  
Prepare a place  
Soon they will be coming

What the hell are you waiting for?  
Get yourself right through that door  
Something cries from the other side  
Something from which you cannot hide

Who can tell where time begins?  
How do you know they're not your friends?  
Darkened eyes that reflect the moon  
Don't you know that they're coming soon

# No Turning Back

Every step upon the road I get another stone ahead  
Wheels will roll and as I go I find direction

It's in motion  
There's no turning back  
Pushing forward  
There's no turning back

Miles and miles  
A thousand trials, a million smiles  
Waves and waves  
Crashing on the sand for days and days  
The currents travel  
There's no turning back  
The rugs unravel  
The tearing of the tracks  
  
There's no turning back
