IT ALL STARTED...

...with the Cadre. Not much is known about this mysterious organization, except this: The Cadre are devoted to science, and fund their research by selling their often deadly technology to the highest bidder.

This time, the Cadre went too far. They created the incredible battle planetoid Anarchis. Their goal was to create the ultimate weapon, and they succeeded all too well. The Cadre realized that if Anarchis were to fall into the wrong hands, it could defeat them. This could not be allowed. To prevent this, they created an awesome fail-safe system, a huge thought-controlled

computer to run the planetoid. This computer would respond only to the captain's thought.

With Anarchis safe, the Cadre turned to another project. Combining Human, Feran, and Manti genes, they sought to create the ultimate soldier. They augmented their genetic mix with mechanical, electronic, and organic sub-systems. They named the fruits of their labors Rygil.

But, once again, their success was their failure. Rygil became self-aware, and stole Anarchis. He traveled out into the universe to satisfy his maniacal lust for conquest.

The Aycul region wasn't ready for Rygil and Anarchis. The four major empires

in the region, the Human alliance, the Feran Empire, the Manti Collective, and the Cyben, co-existed in a fragile peace. This peace was about to be shattered.

When Rygil brought Anarchis into the Aycul Region, he called upon the various races to send their best fighter to his competition. The price of failure in the competition was the destruction of their planet. The prize for victory was Anarchis itself.

The four major empires sent their best, as did the Kanti of Tropis, the Karlakiaans, the Magment, and the inhabitants of Ursae. Sadly, none of the fighters were able to defeat the mad Rygil, and he used the power of Anarchis to destroy their planets. Rygil kept his defeated foes, forcing them to fight him, each other, and any new challengers that might appear, over and over and over again.

The Cadre set about to correct their mistakes. Using the Rygil technologies, they sought to create a better fighter. After two years of work, the Kwondo prototype was brought on-line. However, like Rygil, Kwondo manifested self-awareness and dangerous tendencies. After a costly struggle, Kwondo was destroyed.

Kwondo MKII, an android without the violent tendencies of the previous cyborgs, was the Cadre's next project. After five years of hard work, they succeeded and brought Kwondo MKII on-line.

The Cadre sent Kwondo out to fight Rygil and destroy Anarchis. Along the way, Kwondo met with Linna, one of the high-commanders of the Dhotis forces. Linna had managed to avoid the destruction of her planet, and had stood by in horror as it was destroyed by Anarchis. Now, together with Kwondo, it was time for revenge...

GETTING STARTED

installing FX Fighter Turbo

Important Note: For additional technical information and troubleshooting tips, please consult the README file on CD-ROM or the Quick Reference card.

Windows® 95 installation

1. Insert the FX Fighter Turbo CD-ROM into your computer's CD-ROM drive.
2. Select "Install FX Fighter Turbo" from the window that appears.
3. Follow the on-screen instructions.

Uninstalling FX Fighter Turbo under Windows 95

FX Fighter Turbo can be easily removed from your computer when you are finished playing. To uninstall FX Fighter Turbo, double click on the Add/Remove Programs icon located in the Control Panel folder. Highlight the FX Turbo listing and click on Add/Remove. (For more information, please see the Readme file on the CD-ROM or refer to the Quick Reference Card.)

Starting the Game

1. From the Start menu, find the FX Fighter Turbo group under Programs.
2. Find the FX Fighter Turbo icon and click on it to start the game.

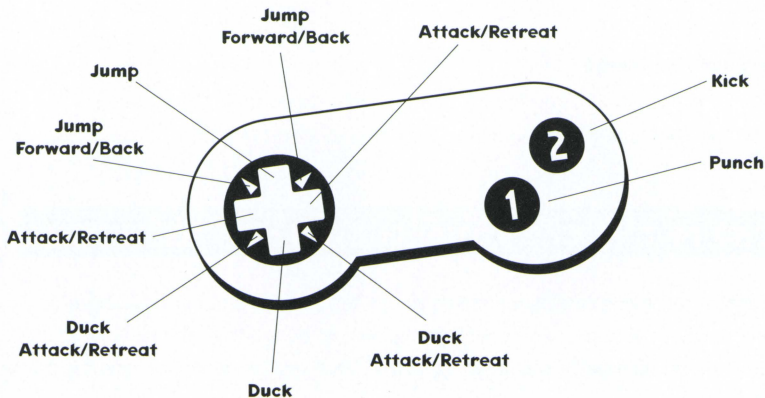

CONTROLLING THE GAME

FX Fighter Turbo is a fast-pace fighting game, full of quick action and sudden violence, where you must use your fighting skills to defeat the cyborg Rygil, and destroy the horrible battle-planetoid, Anarchis. This section describes how the game functions work.

Control Pad

If you are using a control pad, please refer to the diagram below:

Note that control orientation may be reversed, depending on your character's location relative to the opponent.

Attack=Move character towards opponent
Retreat=Move character away from opponent
Note: Configuration of gamepad buttons may differ.

Keyboard

If you are using the keyboard to play FX Fighter Turbo, please refer to the keyboard layout, below:

Attack+Jump=Jump forward **Retreat+Jump=Jump backwards**
Attack+Duck=Duck while attacking **Retreat+Duck=Duck while retreating**
Duck+Attack/Retreat+Kick=Roll Left/Right (Keyboard & Control Pad)

Here are some additional controls:

<i>Function</i>	<i>Player 1</i>	<i>Player 2</i>
Change character shading detail	f1	f3
Change character texture detail	f2	f4
Change ring texture	f5	
Background on/off	f6	
Pause	f12	

STARTING A GAME

When you start FX Fighter Turbo, you'll see the MAIN menu:

To start a game, select the appropriate game type, and press Punch. ↑ and ↓ will move you up and down the menu. For more on the different game types, read on.

1 Player:

When this option is selected, you are prompted to pick a character. Use Player 1's control pad or keyboard controls to select the character you want. If you'd like to play a randomly selected character, pick the red ? icon.

Once you've chosen your character, you'll see the character's portrait in the top of the screen. Now you need to choose your handicap. Use ← and → to select your desired handicap, and press Punch when you are done. Once you are finished, the computer selects your first opponent, and your first match starts right away.

2 Player:

When this option is selected, each player is prompted to pick a character. Use the respective player's control pad or keyboard controls to select the character desired. Once again, a randomly selected character is available by picking the red ? icon.

When the characters are chosen, it is time to select a handicap for each player. Use the respective ← and → to select the desired handicap, and press Punch when finished. Once the handicaps are decided, Player 1 can use ↑ and ↓ to select one of the arenas. Press Punch to start the game.

Tournament:

When this option is selected, both screens rotate to allow you to select the number of players. Use ← and → to choose how many players you desire, and press Punch. The maximum number of entrants is eight. Once you've selected the number of players, the screen rotates to show

empty boxes. Each player needs to select a character, as per above. Odd number players (1, 3, 5, 7) use the Player 1 controls to choose their character; even number players (2, 4, 6, 8) use the Player 2 controls to choose their characters.

Once all of the characters have been chosen, the computer selects a number of AI opponents to fill out the tournament. Then the bouts begin! If there is a match where the computer is playing both combatants, you can skip to the next match by pressing Punch on Player 1's controls.

Endurance Mode:

When this option is selected, both screens rotate to allow both players to select the number of characters they wish to use. Use → and ← to select the number of characters. Once the number of characters have been selected, press Punch to proceed with character selection, as per above.

Once you've chosen your character, you'll see the character's portrait in the top of the screen. Now you need to choose your handicap. Use ← and → to select your desired handicap, and press Punch when you are done. The computer now selects your first opponent in the order the players were selected, and your first match begins.

OPTIONS MENU

The OPTIONS menu allows you to control various aspects of FX Fighter Turbo. The following section helps you understand these options.

Detail Level:

This allows you to determine the level of detail being used to display images; using less detail speeds up the display.

The first option selects whether the character detail is on or off for either player. When this option is highlighted, press ← and → to change from ON to OFF.

The second option selects what level of arena detail is used; the first part selects the floor texture, and the second part selects the floor detail. When the Floor Texture option is highlighted, press ← and → to change between Flat, Textured, or Perspective (in increasing detail). When the Floor Detail option is highlighted, press ← and → to change between Low, Medium, or High detail.

When you have the settings you want, highlight Exit to and press Punch to return to the Options menu.

Controls:

This allows you to configure your controller. The section on the left-side of the screen details Player 1's options; Player 2's options are on the right side.

The first option selects whether the players are using the keyboard or a control pad to control his character. When this option is highlighted, press ← and → to change from one to the other.

The second option allows the player to redefine the keys. When selected, the bottom of the screen rotates to show the above screen.

Each move has a key description next to it. Use \uparrow and \downarrow to move through the options. When you find an action you'd like to redefine, press Punch. The key description disappears. Press the key you'd like to use for this option, and it appears next to the move. Repeat this sequence to redefine the other keys, if so desired. When you are happy with your selection, highlight Exit and press Punch.

Bout Options:

When this screen is selected, the lower screen rotates to show the following sub-menu:

Use \uparrow and \downarrow to move up and down the menu.

When TIME is highlighted, use \leftarrow and \rightarrow to select between 30, 60, 90, and infinity seconds.

When LEVEL is highlighted, use \leftarrow and \rightarrow to select the AI's difficulty level between 1 and 8; the higher the number, the tougher the AI.

When BEST OF ROUNDS is highlighted, use \leftarrow and \rightarrow to select between 1, 3, 5, and 7 rounds needed to win the match.

When GAME SPEED is highlighted, use \leftarrow and \rightarrow to select between slow, normal, fast, and turbo game speeds.

When AUTO SAVE STATS is highlighted, use ← and → to enable or disable automatic saving of the game statistics such as high score tables to the hard disk.

When QUICK CONTINUE is highlighted, use ← and → to select between same and new characters.

Selecting EXIT will return you to the OPTIONS menu.

Statistics:

When this option is selected, the lower screen rotates to show you the following sub menu:

2 PLAYER STATS shows the outcome of the last 2-player game.

HIGH SCORES shows you the highest scoring players' initials and rankings.

COMBO HIGH SCORES shows you the largest number of combos performed for each character.

EXIT returns you to the OPTIONS menu.

Load:

Selecting this option restores all options to their default settings. All DETAIL LEVEL values are calculated to enable FX Fighter Turbo to run at its optimum speed on your PC.

Sound:

When this option is selected, the lower screen will rotate to show the following sub menu:

COMMENTARY allows you to use ← and → to select between on and off.

SOUND FX VOLUME allows you to use ← and → to select the volume level for the sound effects. Selecting 0 turns the FX off; selecting 7 sets the sound FX at their loudest.

CD VOLUME allows you to use ← and → to select the volume level of the CD music. Selecting 0 turns is off; selecting 7 sets it at the highest level.

EXIT returns you to the OPTIONS menu.

Save:

Selecting this option saves the current option settings to your hard drive

Exit:

Selecting this button returns you to the MAIN menu.

ARENAS

There are 11 arenas where the fighting competition can take place. Each one is a simulation of the alien fighters' home planets.

CHARACTERS & MOVES

Understanding the Character Move List

The move sequences are depicted using arrow keys and letters for simple interpretation on implementing combo moves while using a control pad (This is recommended for optimum control of your fighter). If you are using a keyboard to control your fighter, please refer to the keyboard layout in the “Controlling the Game” section of this manual to execute combo moves.

Important Note: All moves assume that you are a fighter facing *RIGHT* toward your opponent. Reverse the direction of your moves if you are a fighter facing *LEFT*.

IPX NETWORK PLAY

For network play, both players select the network button on the main menu. A dialogue box will appear showing the choices you have for remote competition. Both players choose "IPX Network."

Player 1 chooses new session while Player 2 waits for Player 1's session to appear in his dialogue box. Once this has appeared, Player 2 must choose the session he wants to join. Both machines will now display a message: "waiting for network player." Once the machines have synched, both players will get to choose a character and the game will continue as normal.

MODEM PLAY

For modem play, both players select the network button on the main menu. A dialogue box will appear showing the choices you have for remote competition. Both players choose "Modem."

Player 1 chooses a new session and a message will appear: "waiting for other player." Player 2 must choose a session, enter the telephone number of Player 1 and click OK. Player 2 can now dial into Player 1. Once the machines have synched, both players will get to choose a character and the game will continue as normal.
